Experience

Owner - Chinnock Enterprises
2012 - Present (4 years)

The DBA for my ongoing side-project. I do web-app design and development, scripting, administration, support, recovery, electronics repairs, and on-site installs (home-wide audio, cams, hdmi, ethernet, security, automation, etc).

Sales - Digitell Cellular(ref-1)
April 2015 - September 2015 (6 months)

I enjoy the intensity, intimacy, and immediacy of personal sales. Digitell offered every avenue for success: tools for getting people in, getting them happy, and bringing them back for more. The company structure had pleasantly low resistance and rampant talent scouting, allowing motivated individuals to exert maximum benefit within their competencies (and grow these areas) in short time.

Partner - Native Paint and Drywall(ref-3)
January 2014 - May 2014 (5 months)

I guided this startup into maturity, tackling partnerships, CRM, legal filings, infrastructure, and SEO/web-presence.

AppleCare iOS
April 2013 - December 2013 (9 months)

I provided technical support for Apple products and services, balancing several metrics and inventing upsells along the way.

Sales - Digitell Cellular(ref-1)
June 2011 - March 2013 (1 year 10 months)

This was a great experience and my first taste of sales. I was technically proficient in a market of emerging tech (remember smartphones five years ago) and at one of the least 'techie' demographies in the company. And so, I began collecting and evolving strategies for "earning the right," scope, guidance, and redirection, which have matured quite well to date.

Preschool Teacher - Lasting Impressions(ref-2)
May 2005 - December 2010 (5 years 8 months)

This was one of the most rewarding and stressful jobs I've ever had. It was also a challenging immersion into applied psychology with highly valuable takeaways.

Education

Catalina Foothills High School
2004-2007

High School Diploma, Media & Technology
Activities and Societies: Media, Theatre Productions, IT

Skills & Expertise

Microsoft Administration
Server 03,08,12

Linux Administration
RHEL 5,6,7
Debian
Gentoo

Network Administration
CCNA level understanding

Database Administration
mySQL/MariaDB
Neo4j/Cypher
MongoDB

Web Languages
JavaScript
 ES5
 ES6
 jQuery
 Node/V8
HTML 5
CSS 3

Hardware Components
Diagnostics
Circuit Theory
Repair and Reflow

Android
Electron Apps
Android Development
Bridge

Scripting
Perl
Bash
Python
Batch
Ruby

Leadership(ref-1,3)
Teambuilding
Management
Delegation
